

Eonlipid®

FOOD SUPPLEMENT AGAINST
LIPID AND METABOLIC DISORDERS,
OXIDATIVE PROCESSES AND FREE
RADICALS

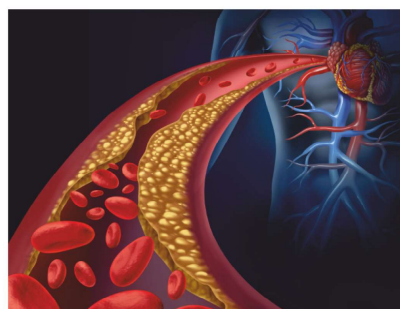

EONLIPID is a multicomponent food supplement based on **Hydroxytyrosol, Maqui, Amla, Monacolin K** and **herbal extracts**.

WHEN USING EONLIPID

On the basis of the international literature it is indicated:

- in **cardiovascular** and **brain** degenerative diseases
- for the activation of **lipid / glycidic metabolism** and against metabolic syndrome
- against the processes of **atherogenesis**
- to combat **inflammaging** (senescence and cellular inflammation)
- against **oxidative stress** and **free radicals**

THE NATURAL INGREDIENTS OF EONLIPID®

Hydroxytyrosol is derived from olive and it has proven antioxidant, anti-dyslipidemic (1) properties

and contributes to regulate blood pressure and circulation (2); hydroxytyrosol is an innovative natural ingredient extremely promising in metabolic syndrome (3) and in the management of "inflammaging" (inflammation causing aging process).

Maqui (*Aristotelia chilensis*, Mol.Stuntz) is an energizing berry with multiple beneficial effects on metabolism (4), and it is probably one of the most

powerful natural principles in terms of antioxidant power (5) and thus it is very useful in the fight against free radicals (6).

Amla (*Phyllanthus Emblica*) forms the basis of nutritional therapy in Ayurvedic medicine, by virtue of its certified antioxidant power (7) and its efficacy in hyperlipidemias (8) and in metabolic syndrome (9).

Monacolin K, extracted from red yeast rice (*Monascus purpureus*, Went), is a natural statin

with a documented lipid (blood cholesterol namely) lowering effect (10).

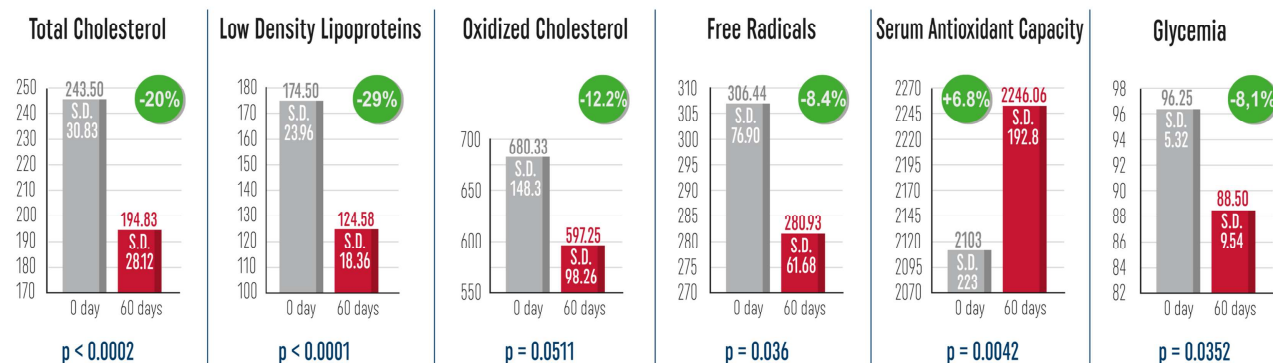

Berberine is another natural substance with proven blood lipid lowering effect (11), while

Coenzyme Q10 (ubiquinol) provides special protection to heart and muscle functions (12). The administration of **Folic Acid** contributes to regulate methylation processes (which may damage DNA) and the normal homocysteine metabolism, which interacts with athero-thrombotic processes (13).

Astaxanthin with its high antioxidant power (14) complete the list of the natural principles of Eonlipid.

Observational PILOT STUDY

A polyphenol-based multi-component nutraceutical in dysmetabolism and oxidative stress: results from a pilot study. Corsi R, Mosti G, Cavezzi A, Urso S.U., Dimitrova G, Fioroni, Colucci R, Quinz V J of Dietary Supplements 2017

EONLIPID is a unique supplement: 8 natural ingredients in a synergic **anti-aging** action and to combat **lipid profile disorders** and **metabolic alterations**.

Ingredients:

Maqui berry (*Aristotelia chilensis* [Mol] Stuntz) freeze-dried fruit; olive tree (*Olea europaea* L.) leaves d.e. (10-12% hydroxytyrosol). Charging agent: microcrystalline cellulose; Barberry (*Berberis vulgaris* L.) bark d.e. (98% berberine); Amla (*Phyllanthus emblica* L.) fruit d.e. (30% of tannins); Ubiquinol (coenzyme Q10 reduced); fermented red rice (*Monascus purpureus* Went) microfungii d.e. (5% monacolins K); *Haematococcus* (*Haematococcus pluvialis* Flotow) microalgae d.e. (2.5% astaxanthin); folic acid; anti-caking agents: vegetable magnesium stearate, colloidal silica. Dry extracts are supported on corn maltodextrins.

Serving size:

1 or 2 tablets a day between meals.

Warnings:

Warnings: do not consume a daily quantity equal to or greater than 3 mg of monacolins from red fermented rice (1 tablet of Eonlipid contains 1 mg of monacolin K). It should not be consumed by pregnant or breastfeeding women, children under the age of 18 and adults over the age of 70. It should not be consumed if you are taking medicines to lower cholesterol or if you already consume other products containing red yeast rice. Consult a doctor about consuming this product if you experience any health problems. Food supplements should not be understood as substitutes for a varied, balanced diet and a healthy lifestyle. Do not exceed the recommended daily doses. Keep out of reach of children under 3 years of age.

Content of active ingredients

Ingredients	1 tablet	2 tablets
olive leaves dry extract	75 mg	150 mg
corresponding to Hydroxytyrosol	75 mg	15 mg
maqui dry extract	150 mg	300 mg
amla fruit dry extract	100 mg	200 mg
corresponding to tannins	30 mg	60 mg
red yeast rice dry extract	20 mg	40 mg
corresponding to monacolin K	1 mg	2 mg
barberry root bark dry extract	125 mg	250 mg
corresponding to berberine	122.5 mg	245 mg
haematococcus algae dry extract	10 mg	20 mg
corresponding to astaxanthin	0.25 mg	0.5 mg
coenzyme Q10 (ubiquinol)	50 mg	100 mg
folic acid	100 mcg	200 mcg

EONLIPID supplement tablets are packaged in blisters. One pack contains 30 tablets. EONLIPID does NOT contain gluten or sweeteners, it is GMO FREE and Vegan OK
